Another of Our First Settlers Passes

Word has been received that John Burton who came to this district in 1894 along with the first settlers, died near Guelph, Ontario, about the 1st of March.

Mr. Burton homesteaded on the S.W. 22-31-1-5 and after living on it for ten or twelve years sold to Mr. J. C. Reimer. On returning to Ontario he bought a farm six miles from Guelph, where he resided until his death.

Silver Wedding.

A number of friends gathered at the home of Mr. and Mrs. A. Schwesinger on Friday evening, April 1st, the occasion of their silver wedding anniversary. After a social evening a delicious lunch was served by the bride. The guests extended best wishes to Mr. and Mrs. Schwesinger for many more years of happy wedded life.

Hospital Bill Passes Alberta Legislature.

The bill enabling the town of Didsbury to enter into an agreement with the municipalities of Mountain View and Westerdale to provide better hospital facilities in Didsbury, was passed by the Alberta legislature last week.

The agreement provides for the passing of a by-law for a debenture issue of \$30,000 for the erection and equipment of a hospital at Didsbury.

The town will be required to issue the full debenture and the municipal districts each agree to pay one-third of the debenture, viz. \$10,000.

The debenture will be for a term of 15 years and the amount payable by each of the municipalities and the town will be \$1,028 each year.

The councils of the town and municipalities will very likely pass the necessary by-laws in the near future in order that the matter may be put to a vote of the proprietary electors.

In the case of the town a vote will necessarily be required, but in the municipalities the councils may pass the by-laws and after advertising the same no election would be necessary, unless a petition signed by 15 per cent of the proprietary electors was presented demanding a poll.

"Socreds" to Contend Saskatchewan Seats

Premier Wm. Aberhart of Alberta rejected co-operation with the Co-operative Commonwealth Federation forces for the coming Saskatchewan election. Social Credit candidates will therefore be nominated in every constituency, according to a report read at North Battleford on Monday night by G. H. Williams, the C.C.F. leader in Saskatchewan.

Bags 'Depopped.'

Little boys whose parents purchased paper bags of broken bread at the Inglewood bird sanctuary with which to feed waterfowl have been known to shatter the quiet of the retreat by blowing up the empty bag and "busting" it between their hands.

Now they are finding that the "bang" has been taken away. The bags have little round holes punched in them before they are filled with crumbs.—Herald.

The Production Tax.

Under terms of the new Production Tax Act introduced into the legislature by Hon. Lucien Maynard, minister of municipal affairs, the Alberta government becomes the owner of 7 per cent of all agricultural produce grown in the province.

Authority for the transfer of this percentage of produce is granted in a section which reads:

"On, from and after the first day of the month next following the month in which this Act is proclaimed to be in force, seven undivided parts of all agricultural produce shall, as and from the moment upon which the same comes into being, be vested in His Majesty, in the right of the province, to be used in such manner and for such purposes as are hereinafter provided."

Introduction of this bill is a long step forward in the government's plan to re-align the whole taxation system and to shift it from the land to those places where it is believed it can best be borne.

The bill includes provision for a reference to the Supreme Court of Alberta for a test of validity prior to its coming into force.

Snowfall Brings Welcome Moisture

The blanket of wet snow which fell Monday and Tuesday, although tending to delay seeding operations, was welcome for the increased moisture it will provide. The snowfall was general from Macleod to Red Deer and varied in depth from two inches in the south to six in the north.

Moisture conditions for the prairie sections of Alberta were 18 per cent above normal before the recent blizzard which increased them considerably, and all areas in Alberta report at least normal conditions, with the exception of a strip from Edmonton to the Saskatchewan border, which indicates a 20 per cent deficiency, a report from Winnipeg states.

Will Celebrate "Vimy Night"

The local branch of the Canadian Legion will celebrate "Vimy Night" with a smoker on Saturday, April 9. All returned men, whether members of the Legion or not, are invited to attend.

Union Services During Holy Week.

The M.B.C., Evangelical and the United Churches are combining their mid-week services for the purpose of a special study of the passion of our Lord leading to re-dedication. The following is the program:

Wednesday, 8 p.m., E.V. Church

"Christ and Gethsemane"

Rev. Oscar Snyder

Thursday, 8 p.m., M.B.C. Church

"The Seven Last Words"

Rev. J. R. Geeson

Friday, 11 a.m., United Church

"The Challenge of the Cross to Modern Life"

Rev. A. S. Caughell

A cordial invitation is given to all to attend these union services and a large attendance is expected.

Government Assistance To the West.

The Dominion government is coming to the aid of the drouth sections in Saskatchewan and Alberta in order that farmers therein may be supplied with seed for their farms this spring.

It is calculated that there are 81,000 needing assistance in this respect in Saskatchewan and 15,000 in Alberta.

The Dominion will guarantee Saskatchewan's credit up to \$14,500,000 and Alberta's credit up to \$1,900,000 in order that seed requirements may be met. Manitoba will be able to finance its own seed grain relief this spring.

Last year the federal government came to Alberta's assistance to the extent of \$1,600,000 and to Saskatchewan's with \$6,600,000.

The Canadian Wheat Board has available enough wheat to provide for the seed requirements of the two provinces aforementioned.

Under the plan the individual farmer obtains his seed requirements through the co-operation of the banks, the local municipalities, and at the end of the spring, in the position of guarantor, is the federal government. Loans are first made by the banks to the municipalities. The provincial governments guarantee the credit of the municipalities, and the Dominion government that of the provinces.

Horses Returned To Saskatchewan

The movement of horses, which were sent to winter in this district by the Saskatchewan government, back to their home farms, commenced on Tuesday morning when six carloads were freighted on their return journey.

About 45 carloads were brought here and distributed to different farms in the district. The horses came from all parts of the dried-out areas in Saskatchewan.

Universal Fingerprinting

For some reason or another, hard to explain, proposals that citizens submit themselves to voluntary fingerprinting as a means of subsequent identification in the event of emergency, have met with nothing but indifference, if not actual aversion on the part of the general public in this country.

This is somewhat surprising when one considers with what enthusiasm this proposal has been received in the United States and some other countries where numerous organizations have taken up the movement and have been successful in interesting the average citizen to a considerable degree.

Possibly the fact that hitherto fingerprinting has been associated solely with the identification of criminals may have something to do with the average Canadian's "cold shoulder" attitude towards fingerprinting, for the general mill run of Canadian citizen is essentially law abiding and is apt to resent the slightest hint that he is not; and this mistaken viewpoint towards fingerprinting may account for his attitude.

On the other hand the diffidence with which suggestions and invitations for fingerprinting on wholesale but voluntary basis have been received in this country to date may be due to lack of knowledge of the benefits which such certain means of identification would confer generally, not only upon the individual but on the entire community. In all probability this is the principal reason for lack of interest in and response to this method of indexing for identification in Canada.

Has Many Values

A dozen ways in which universal fingerprinting would be of value to the individual citizen and the community in toto were set forth recently in a letter appearing in an Ontario daily newspaper by John Tenbroeck of Thorold, Ont., as follows:

"1. Elimination of election frauds; 2. Elimination of insurance frauds; 3. Minimization of immigration and emigration frauds; 4. Prevention of fraudulent evidence and repudiation of signature on deeds in legal proceedings; 5. Elimination of impersonations; 6. Confirmation of marriages and bigamy rendered impossible; 7. Prevention of the substitution of a corpse for the body of another; 8. Elimination of dope fiends, insane persons and alcoholics;

"9. Regarded by the writer as very important; (a) Prevention of the physically unfit from obtaining an automobile license, (b) License carriers would be unable to fool police by giving a false name when caught violating the law, (c) Persons permanently deprived of driving privileges would be permanently ruled off the highway, (d) As a consequence of better operators an immediate decrease in our appalling death rate on the highways would result;

"10. As a result of decreased deaths and injuries on the highways there would be a corresponding drop in automobile insurance rates; 11. People suffering from loss of memory could be quickly identified, saving relatives money and perhaps a lifetime of worry and uncertainty; 12. Establishment of the true identity of the unknown dead, thereby saving the public the cost of burying them. The number of people buried in nameless graves was 46,000 last year, costing the public from \$50 to \$150 each for their burial."

Reducing Accident Toll

As Mr. Tenbroeck intimates there can be no question of the value voluntary fingerprinting could be made to exert in reducing the toll of accident and death on the highways, if it were made to serve some of the purposes he outlines in his item No. 9. The growing toll of loss of life and property from this cause is verified in recent statistics for last year and is already being reflected in increased automobile insurance rates.

On this ground and this alone, there should be general support for the movement for universal fingerprinting on the part of all who themselves make reasonable use of the automobile and the highways and who are constantly endangered by a reckless minority.

"Millions of men were fingerprinted during the World War, not as a criminal measure, but it was done for the protection of the men," said Mr. Tenbroeck, urging support for universal fingerprinting. "It provided," he reminds those who may have forgotten the fact, "an inviolable record through which identity could never be lost, through death, through injury, loss of memory or any other war incident."

"To-day in many countries, and especially in the United States of America, universal fingerprinting is progressing by leaps and bounds. Rotary, Lions, Kiwanis, Kinsmen, Y.M.C.A., clubs etc., in many localities and States, where drives are being put on for civil fingerprinting registrations, are solidly behind this move. The American Legion, women's clubs, church societies, etc., are working for it."

Police Approval Intimated

Indications are that support will be given the movement in Canada at the annual convention of police chief constables in the summer, as the arguments put forward by Mr. Tenbroeck are reprinted with approval in a recent issue of the Canadian Police Bulletin with a suggestion that "police chiefs should be taking every opportunity to impress the advantages of universal fingerprinting upon the public whom the proposal is designed to serve."

Have Economic Value

Birds Are Also Cheerful Things To Have Around Neighborhood

Birds have an economic value in eating harmful insects and weed seeds. They have an ethical worth in cheering our days with their songs and flash of color. They may be induced to take up their abode in our own yards if we offer them a residence, rent free. Encourage your boys to construct one or more of these bird dwellings in their spare hours. This will be good for both boys and birds.

Summer birds, which do not require houses, may be lured to our neighborhoods by putting out bits of feathers, wool and twine in the nest-building season.

Britain is demanding better movies.

Crown Of Conquered Ruler

Has Been Taken From Ethiopia To Premier Mussolini

The jewel-encrusted crown of conquered Ethiopia has been presented to Premier Benito Mussolini.

Il Duce received the symbol of vanished Ethiopian glory from Marshal Rodolfo Graziani, former Italian viceroy of Ethiopia, who brought it from Addis Ababa, together with Haile Selassie's imperial scepter.

Both were captured when the Ethiopian capital fell to the Italians in May, 1936. Mussolini ordered that the gold crown and scepter be placed on display in Rome's Colonial Museum.

Il Duce congratulated Graziani on his work in Ethiopia, especially for his victory on the southern front in the Ethiopian campaign.

The government announced that 136 Italian workers had died of illness or accident in Ethiopia from December, 1937, to February. The new deaths brought to 1,732 Italians officially reported dead there since Jan. 1, 1935.

"A warm bath stimulates the imagination," says a doctor. "This explains why a man who has taken a warm bath will come downstairs boasting that he has just had a cold one."

Eight-Day Garden Party

Victoria Sets Dates For Show With New Contestants

Snowdrops are up, violets in blossom and with daffodils in flower people in Victoria are all of a dither about the spring garden party. Which, believe it or not, lasts eight days and is unique on the Pacific coast. Elsewhere, too, for the matter of that.

With the dates set for May 4 to 11 inclusive, a very nice selected committee is currying-combing Victoria's list of gardens.

In addition to well-known estates such as those belonging to Lady Barnard at Esquimalt, Mrs. W. C. Nichol, Senator and Mrs. G. H. Barnard, Mrs. Biggarstaff Wilson, all sorts of garden enthusiasts have gone to Victoria to live, whose gardens, up-to-date, their owners considered, weren't quite up to snuff, or at least not good enough to go into a spring garden showing.

Now they are, so visitors will have more designs, plants and theories to argue about—part of the fun of garden week being, apparently, not only admiration, but argument.

HE SUFFERED AGONY IN WET WEATHER

Rheumatism Attacked Limbs And Body

He had been bothered with rheumatism for years. The pain in wet weather—to use his own expression—was "indescribable." But all that is gone now—thanks to Kruschen.

"I suffered with rheumatism for years. I dreaded wet weather, for during such periods the pain was continuous and indescribable. To begin with, it was confined to my limbs, but in time I began to suffer as much agony in my body as I did in my limbs. When I began to take Kruschen Salts, I found it did me more good than all the other medicine I had taken put together. Today, I have peace and freedom from pain, even during wet weather, and can heartily recommend Kruschen Salts to anyone who suffers from rheumatism."—N.M.

Rheumatic conditions are often the result of an excess of uric acid in the body. Two of the ingredients in Kruschen Salts have the power of dissolving uric acid crystals. Other ingredients in these Salts assist Nature to expel the dissolved crystals through the natural channels.

Lost Mining Stocks

Located In Mattress Purchased At Auction Sale

E. J. Prescott, Great War pensioner, bought a mattress at an auction sale. As he unloaded the mattress at his modest bungalow home in Calgary an envelope dropped to the ground.

"I was going to give it to my little girl to play with, then I saw it contained stocks of some kind," he said. The envelope contained mining shares worth \$360.

He immediately notified police and the owner, Mrs. C. E. Kilner, of Calgary, was found. The stocks were returned to her two hours before she boarded a train en route to England.

Do Fast Work

Industrial Britain says the only car-washing equipment of its kind in Great Britain, and the second in the world, has been installed in the large Sheffield garage recently opened by Viscount Nuffield. Thirty men are employed on this car-washing section, which works on chain principle, and by which cars can be washed and lubricated at the rate of one every eight minutes.

Birds find it easy sailing above a steamer for two reasons: Air currents are deflected upward by the ship's movement, and warm air from the funnels also causes rising air columns.

GRACEFULLY FLARED SKIRT ENHANCES DAINTY AFTER-NOON FROCK!

By Anne Adams

A really exciting frock—this refreshing Anne Adams model, for it's not only just what you'll be needing for Spring and Summer afternoon wear, but you'll find it easy as A B C to make at home! You'll look your very best in the dainty V-neckline that's accented by a feminine bow, attractive yokes, and demure puffed or flared sleeves. What's more, you've a graceful flared skirt that adds the final touch of charm to this delightful frock. Can't you just picture Pattern 4735 stitched up in a soft triple sheer, inexpensive flowered synthetic, or for warmer afternoons—in shadowy chiffon?

Pattern 4735 is available in misses' and women's sizes 14, 16, 18, 20, 22, 24, 26, 28, 30 and 32. Size 16 takes 4½ yards 39 inch fabric. Illustrated step-by-step sewing instructions included.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

First Indoor Flight

An indoor flight was made for the first time in history when an aeroplane was flown in a closed hall. An autogyro, designed by Professor Focke and piloted by Fraulein Hannele, to whom Marshal Goering gave the title of flight-captain, rose to the roof of the Deutschlandhalle, Berlin, flew along, turned round, and descended without mishap.

Sensible Advice

A doctor gives the following medicine don'ts: Don't increase the dose of medicine prescribed by the doctor. Don't take medicine in the dark. Don't use medicines that have stood on your shelves a long time. Don't forget to read the label carefully. Don't neglect to shake the bottle well.

It is the forest that has been felled once that is most difficult to get through, for there a secondary growth of low-ebbing shrubs and vines mingles with the taller trees.

Government railways of South Africa are trying dry ice in refrigerator cars.

WORKS IN 2 WAYS ON DISCOMFORT OF

COLDS

1. Take 2 "ASPIRIN" tablets and drink a full glass of water. Repeat treatment in 2 hours.

2. If throat is sore from the cold, crush and mix 5 "ASPIRIN" tablets in ½ glass of water. Gargle twice. This eases throat rawness and soreness almost instantly.

No family need neglect even minor head colds.

Here is what to do: Take two "Aspirin" tablets when you feel a cold coming on—with a full glass of water. Then repeat, if necessary, according to directions in each package. Relief comes rapidly.

The "Aspirin" method of relieving colds is the way many doctors approve. You take "Aspirin" for relief—then if you are not improved promptly, you call the family doctor. "Aspirin" tablets are made in Canada. "Aspirin" is the registered trademark of the Bayer Company, Limited, of Windsor, Ontario. Look for the name Bayer in the form of a cross on every tablet.

Demand and Get "ASPIRIN"

Kept Title And Decorations

Enemy Subject Of Great Britain Once Gave Services To Empire

The late Baron Sir Rudolf Carl Von Slatin Pasha was at one and the same time, an Austrian baron, an English knight, an Egyptian pasha. Briefly, what Lawrence was to Arabia Slatin Pasha was to the Sudan, says Richard Viner in the Daily Sketch. He served four thrones—Queen Victoria, King Edward, King George and the Emperor of Austria. He died in 1932, aged 75. On January 26, 1885, the head of General Gordon was brought to Slatin Pasha as evidence of the fall of Khartoum. On January 26, 1938, the latter's daughter flew to the scene of her father's triumphs and imprisonment. Twenty-two, she is Baroness Winterstein-Gillespie, married to a brilliant young radiologist, half-Austrian, half-English. They live in London. Captive for 11 years Slatin Pasha returned after a romantic escape to become Inspector-General of the Sudan until the Great War. Then he returned to Austria. But for his services to Great Britain neither title nor decorations were taken away. Despite his being an enemy subject the War Office even continued to credit his pay.

A Matter Of Opinion

Two friends met in the street. One of them had had his arm broken in a motor accident and was carrying it in a sling.

"Say," asked the first, "it's too bad about your arm! How long will you have to carry it in a sling?"

The injured man shrugged. "There's a slight difference of opinion about that," he replied. "My doctor says two weeks—and my lawyer says twelve!"

WATER-COLOUR TINTS FOR RESTFUL LIGHTING

THE NATIONAL WALL COATING

Near Approach To Earth Of A Small Planet Brings Some Interesting Comment

Not long ago a planet passed close to the earth, and we give the comments of the Astronomer Royal, Dr. Spencer Jones, on the subject:

A small planet certainly made a close approach to the earth, but when I speak of a close approach I am thinking in terms of astronomical distances.

It is rare of any celestial body to come within a few million miles of the earth and this small planet passed us at a distance of some four hundred thousand miles, which is much the closest approach of any known celestial body. This occurrence has given rise, perhaps not surprisingly, to some conjecture as to what might have happened if it had actually collided with the earth.

Nearly 30 years ago a much smaller body—a large meteor—struck the earth in a remote part of Siberia.

Eye-witnesses of the fall told of the appearance of a mighty flame, much brighter than the sun, giving off great heat, and of a violent explosion followed by a tremendous cannonade, like an artillery barrage, which lasted for several minutes. The meteor fell in a thickly forested region and the trees around, to a distance of about 20 miles, were blown down by the blast of wind when the meteor fell; they were stripped of their bark, and most of their branches had been scorched by the fiery blast. They had all fallen outwards so that when seen from the air there was a strange fan-like appearance. More than one thousand reindeer were killed.

Some thousands of years ago a much larger meteor, or possibly a comet, struck the earth. The scar may still be seen in Arizona as a vast cup-shaped hole with a raised rim, about one mile in diameter and 600 feet deep. This meteor is estimated to have weighed about one million tons. When it fell it bored its way through the hard sandstone rock, generating terrific heat and a vast quantity of steam, which shot it out again with explosive violence. History does not record what the effects of the explosion were, but by comparison with the Siberian meteor we can believe that serious destruction must have been caused at distances of one or two hundred miles.

The planet that recently passed near the earth was probably no more than a mile in diameter and may be estimated to weigh something like one thousand million tons. This exceeds that of the Arizona meteor by about as many times as that exceeded the Siberian meteor.

So by a comparison of the results of these impacts we can get a rough idea of what would have happened if this planet were to collide with the earth. It would probably form a great hole in the earth's surface, perhaps 50 miles across and a mile deep, resembling the larger mountain craters on the moon. Destruction within this area would be complete, and all visible landmarks would disappear.

The explosive blast of scorching air, like that from an intensely hot furnace, would carry destruction far and wide, and effects would probably be felt the whole world over. If it fell in the middle of one of the oceans, gigantic waves would carry destruction far and wide. The escape that the earth had on this occasion may be compared with that of a six-inch target which a marksman misses by 25 feet. A pretty bad show, we should say!

And the chances that the earth will actually be hit by such a planet are so extremely small that we may disregard them and consider conjectures of what might happen if there were a collision as merely idle, though perhaps not uninteresting speculation. —B.B.C. Listener.

Chinese Problems

General Chiang Kai-Shek told Vernon Bartlett, well-known British journalist, he "could not conceive of British recognition of Manchoukuo," and that such recognition would be "a betrayal, destroying Sino-British friendship," according to a special interview published by the London News Chronicle. A country as large as China cannot rapidly be mobilized, Chiang said, dealing with internal problems.

Theory Is Reasonable

That Individual White People All Look Alike To Orientals

There is a theory and it sounds reasonable enough, that individual "whites" look as much alike to the Orientals as the Orientals do to us. It may be a little hard on our racial ego to admit that we can—under these conditions—be reduced to the mass distinction of so many billiard balls, but as we generally believe that Chinamen and Japs have remarkably standardized features and expression, we can't blame them if they turn around and do the same thing. However, it is not a case for war.

What interests us more is the business of the international facial "type". Now, there is not—and it may be because we have gone little further in the struggle for independence than the Statute of Westminster—a Canadian "type"; not so far as we know. There is a French type, an Italian type, a Russian prince type (and he is usually no such thing), and even an English type. There is, we venture to say—with an eye to the three thousand miles of unfortified frontier—an American type.

The fact that you often see an Englishman who looks more like a Frenchman than a Parisian does; or a Russian who looks like a Dane, has nothing to do with the argument. You have to go outside to find out how you look to the foreigner, and to see "ourselves as others see us."

To the German and the Frenchman the Englishman is still John Bull, a full-faced, ruddy, square standing his ground. To others he is a monocled fellow who rarely takes off evening clothes. To the North American the average Frenchman is a small, fussy, excitable man, and the German a thick-necked giant with a sort of jig-saw puzzle of scars on his cropped skull. The Russian, since the revolution, needs a black beard to be human.

You can, of course, go through these countries and never see any of these types. You won't see John Bull, nor the French dynamo, nor the Prussian monster. It is a prime lesson in propaganda.

Having felt the influence of cartoonists and people in picturing others, we can only figure how we might be painted for the benefit of those who might like to regard us as scoundrels. Then they might develop a first-class Canadian type; one that we would prefer not to see.—Hamilton Spectator.

Prefers Scarlet Tunic

Bright Uniforms Inspiring Opinion Of Boer War Veteran

The old-style brilliantly-colored army uniforms, replacing khaki, was advocated by Dr. Joseph Jordon, first (Toronto) to enlist with the Royal Canadian Regiment for services in South Africa. Speaking in Toronto to more than 50 Boer War veterans, at the 38th anniversary of the Battle of Paardeberg, in South Africa, Dr. Jordon, president of the South African Veterans' Association, pointed out that the pre-war red-coated warriors had a much neater appearance, and were much more pleasant to watch while on parade. The present khaki uniforms, he intimated, were drab and not much of an inspiration to the younger generation. Khaki should be used only in time of war, he added.

Learned Something

Jones (dismally): "Yes, I had a balance in the bank not long ago, but since I have been engaged it has all gone."

Friend: "Expensive game, eh? Never mind, love makes the world go round, you know?"

Jones: "Perhaps, but I never thought it would go round fast enough to make me lose my balance."

"I want a rise in my salary on two grounds!"

"What are they?"

"Twins."

He who keeps too many irons in the fire gets burned. 2246

Talking Newspaper

New Sound Device That Vocalizes The News Of The Day

A new method for producing a talking-newspaper was reported in "Editor and Publisher," journalistic trade magazine. The device, by which a sound-track can be produced on ordinary newsprint and the human voice reproduced from the track by means of an inexpensive machine in the home, was invented by W. G. H. Finch of New York.

The invention not only promises to be useful for children too young to read, and for illiterates and blind persons, but also holds the seed of a revolutionary change in the newspaper industry, according to "Editor and Publisher."

Mr. Finch said a newspaper could buy for \$1,000 or \$1,500 a master recording machine which would produce the visible sound track. This track is simply a miniature of the picture produced in an oscillograph by talking into it, in other words, the wave line made by a pen actuated by sound impulses. From the visible sound track, a plate would be made to be inserted into the regular newspaper makeup.

The sound would be reproduced by means of a reproducer which, Mr. Finch said, could be manufactured for as low as 25 cents apiece, providing volume production was great enough. The producer, measuring about nine inches long and five inches square, includes scanning equipment made up of a light source to be focused upon the printed sound track and a photo-electric cell sensitive to the varying light intensities refracted from a record, or newspaper. A preamplifier is associated with the photo-electric cell to amplify the electrical signals generated by the cell. The output of the preamplifier is amplified further by connecting the reproducer with any radio loud-speaker, through a patented device.

Lawyer May Win Millions

Takes Advantage Of Obscure Law Regarding Unclaimed Money

A Philadelphia lawyer stands to win about \$4,000,000 if all the unclaimed money he has reported to the state finally reaches the Pennsylvania treasury and his claim is approved by the courts.

A Dauphin County judge issued a writ of mandamus in favor of Attorney Michael Edelman under a law providing that an informer who reports unclaimed money and prosecutes and proves his case is entitled to one-fourth of the amounts that revert to the commonwealth.

Edelman filed with the court a list of corporations which hold dividends declared but unpaid, matured interest on debts which had not been paid because the owners are unknown, funds owing to unknown persons, unclaimed stock and customers' deposits which have not been returned.

Edelman said he and another attorney spent four years and a great deal of money gathering the information.

Modern Mining Plant Near Arctic Circle Is Responsible For Canada's Radium Supply

Could Teach Scientists

Witch Doctors Of Gold Coast Still Have Secrets

Dr. Cicely Williams, one of the young pioneer women doctors who, nine years ago, went to work on the Gold Coast, once "The White Man's Grave", and led the attack of science on witch doctors, has found that those black mystery men can still give tips to western medicine.

After working among them, seeing as much as they would allow of the strange cures which have been handed down for centuries from one witch doctor to the next, Dr. Williams feels there is something in this "witchcraft".

"Some of their cures are genuine and convincing; they undoubtedly have some effective treatment for tetanus," she says.

Western medicine has no treatment which doctors would care to describe as effective.

Dr. Williams describes the witch doctors' methods as "complicated" but adds that they would "repay investigation."

Writing in the *Lancet* of the natives, she says:

"The African male is much addicted to the habit of sitting in the shade and playing warri, discussing his prowess, or manufacturing political or litigious situations. He is content to see his women folk heavily overworked on his farm or to pay wages to an alien laborer."

"A wife is an investment. One costs about \$50. She works for her husband, cooks his food, cultivates his farm, engages in petty trading, and when there are children she goes home to mother, who brings them up."

Thatcher Wheat

May Be Recognized As Equal To Marquis, And Acceptable For High Grade

E. B. Ramsay, chief commissioner of the board of grain commissioners, announced that Thatcher wheat, rust-resistant variety likely to occupy the largest share of the 1938 acreage in Manitoba and portions of Saskatchewan, may be recognized as "equal to Marquis" and acceptable for the grade of No. 1 Manitoba northern.

Mr. Ramsay referred to the experimental shipment of Thatcher and Coronation wheats to the United Kingdom and added:

"Information received would indicate Thatcher wheat as No. 1 Manitoba northern has been confirmed. In other words, Thatcher wheat will be recognized as being 'equal to Marquis' in milling quality."

Thatcher was produced from a cross made at the University of Minnesota in 1921, the parents being a Marquis-Tumulo hybrid and a Marquis-Kanred hybrid.

Lacy Crochet Flatters Its Wearer

Household Arts by Alice Brooks

It's Crocheted 'Round and 'Round Without a Seam

PATTERN 5612

There's a lacy sheerness in this dainty crocheted blouse, right for a variety of occasions. Simply crochet it 'round and 'round, thus doing away with seams. Smart in string (you can make it in yarn, too), the body of the blouse is just plain mesh, while an oh-so-easy open stitch forms the prettily curving yoke and sleeves that gather into puffs. The skirt is flared and in a plain stitch. Pattern 5612 contains instructions for making the blouse in sizes 16-18 and 38-40; an illustration of it and of stitches; material requirements. Price 20c. Pattern 5839 contains instructions for making the skirt in sizes 16-18 and 38-40; an illustration of it and of stitches; material requirements. Price 20c.

To obtain these patterns send 20 cents each (40 cents for both) in coins (stamps cannot be accepted) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

Canada's radium industry reports progress in 1937, with an appreciable increase in production at the property of Eldorado Gold Mines, Limited, at Great Bear Lake, Northwest Territories. The all-round expansion program announced at the beginning of the year has been virtually completed, and consequent on increased output at the mine the company is enlarging the capacity of its refinery at Port Hope, Ontario. Including the radium laboratory proper, five new buildings have been erected, and the new facilities at the refinery will make possible a capacity triple that of the previous plant, and also make provision for new products not yet included in Eldorado's growing radium-uranium-silver-lead-copper production list. The uranium products are widely used in ceramic and other industries and a record demand is being experienced for them.

Development work at the mine included an 8,000-foot underground advance, and construction of several buildings. The mine has been electrified by the installation of new Diesel and boiler equipment, the oil for fuel being obtained from the wells at Norman. Installation of this, along with such equipment as a jig, filter and additional flotation cells, was all completed in December. The new construction at Eldorado itself includes two 70,000-gallon tanks for fuel oil, a chemical laboratory, a new assay office, and a new two-storey kitchen and dining hall. For the No. 2 or gulch shaft, the construction work included an electric transmission line from the central workings as well as a road. The two-compartment shaft has been completed to 125 feet, shafthouse erected and electrically equipped. At Bonanza, on Dowdell Point, road construction has also been completed as well as the power house, blacksmith shop, head-frame and other necessary buildings.

The discovery of pitchblende and silver ores by Gilbert Labine at a point to the northwest of Echo Bay, Great Bear Lake, Northwest Territories, in May, 1930, was one of the most romantic events in the history of mineral exploration. Considering the remoteness of the region, about 40 miles south of the Arctic Circle, the establishment of a modern mining plant capable of handling 100 tons of ore a day and permanently employing more than 100 men, is a remarkable achievement.

Confident Of Success

Young Singer Fitting Himself For Operatic Career Before Sight Goes

A 22-year-old Philadelphia singer, reconciled to the fact that he soon will be blind, has embarked on a determined race for an operatic career before his sight is totally gone.

"I can do it! I will do it!" vowed husky, bass-voiced David Hartley. "All I've got to do is study hard while I can still see a little."

Hartley is afflicted with choroideremia, which already has partly obscured his vision. Physicians say there is no known cure.

A former Metropolitan Opera star heard Hartley sing. He invited the six-footer to his studio and volunteered to teach him—if there was time.

"Within two years," he told Hartley, "you'll be self-supporting. In six months, you already have done the work of years."

"It will be easy," said the young singer. "German, French and Italian—I'm learning them all. And piano and more and more work on voice production."

Gets Plenty Of Exercise

Fred Lamb, a watchman for 19 years with Waterous, Limited, is the "walkingest" man in Brantford, Ont. He has never had a vacation since he started the job, and travelling a distance of 15 miles per night about the plant, according to his computation, he has gone 103,740 miles in the 19 years.

In Vienna girls are undergoing training for employment as domestic servants in Great Britain.

Nearly 53,000,000 people in Japan now have postal savings accounts.

The World of Wheat.

By H. G. L. STRANGE

Director, Research Department
Searle Grain Co. Ltd.

Exchanging the products of the soil of one country for the fruits of the labour of other areas, has been practiced since the earliest times.

Wheat grown six thousand years ago on the fertile plains of the valleys of the Nile in Egypt and the Euphrates and Tigris rivers in ancient Babylon, was a most important product in this international exchange.

Succeeding waves of civilizations farmed these same lands. The Sumerians, the Assyrians, the Babylonians, the Chaldeans, the Hebrews, the Medes, the Persians, the Phoenicians, the Egyptians, the Greeks and the Romans, all in their turn were producers and exporters of wheat.

Then Britain, Poland, Rumania, Russia, the Argentine, the United States, and later Canada, became, each in turn, the chief world wheat exporter.

Canada two years ago shipped wheat and flour to 92 different countries and to 61 last year.

For 6,000 years or more it has been recognized that the exchanging of products between nations was the surest way to improve the standard of living of the people. It seems a pity now that governments are acting contrary to the teachings of history, by placing artificial restrictions in the way of that international trade which has ever been so beneficial to mankind.

Following factors have tended to raise price: Moisture needed in Hungary, Italy and Australia -- Some rust damage reports received from India -- Low temperatures interrupt field work in Algeria -- Drought prevails in Morocco -- Rain delay Argentine corn harvest -- Hostilities interfere with Chinese wheat seedings -- Austria, Germany and Czechoslovakia buying Hungarian rye.

Following factors have tended to lower price: Spring seeding under way in Europe and U.S.A. -- Corn picking and wheat sowing commences in the Argentine -- Beneficial rains in U.S. winter wheat belt -- General rains relieve Rumanian drought -- Danubian countries still offering wheat generously -- Cuban vegetable exports increase.

Extension of the federal-provincial farm placement scheme for one month, to April 30th, has been approved by the Dominion government, according to word received by officials of the provincial relief branch.

Some 5,300 single unemployed men who were placed on farms in this province are covered by the scheme, which was to have lapsed on March 31.

Completion of 24 drilling wells in Turner Valley before the end of August this year was forecast in a compilation of the Turner Valley development program by E. W. Kolb, Calgary oil operator.

Mr. Kolb listed 31 wells drilling in Turner Valley, 14 to start, and 14 "wildcat possibilities."

Scout and Cub Corner.

1st Didsbury Troop Scouts
1st Didsbury Pack Cubs

Six new recruits are now ready to pass their Tenderfoot tests, and it is expected these will be completed shortly.

Second Class tests are underway and it is likely a number of Tenderfoot scouts will gain these badges by the end of May. These tests include elementary first-aid, observation, resourcefulness, thrift, firelighting, cookery, Morse code and compass reading. In connection with these tests, Dr. Clarke gave the first of a series of instructive lectures in First-Aid on Monday evening. The Doctor will continue instruction until a full course in elementary first-aid has been completed.

The Wolf Cub Pack is at present busy with Semaphore tests. Under leadership of W. W. Gillrie the Cubs are becoming very efficient in their various subjects. Their delivery of the pack "howl" in their opening exercises is very impressive.

The Group Committee met on Saturday evening last, when various phases of the Scout and Cub work were discussed, of which the public will hear more in due course.

"The Boy Scout movement brings home to the youth of the land the principle that they must learn to obey before learning to command" -- Mayor Adhemar Raynault, Montreal, on "Scouting". In addressing Quebec Scout leaders the mayor stated, "An important group of men such as you help to keep order in society."

Austrian Scouts face disbandment: Compulsory disbandment, as in the case of the Boy Scouts of Germany, Italy and Russia, is now faced by the Boy Scouts of Austria, as a result of absorption of that country by Hitler. Dictators have no use for youth organizations among whose principles is that of international friendship. The world Scout census of 1937 gave Austria 10,466 Scouts and leaders.

The EAST eats 20,000,000 pounds of Western Butter!

Ten thousand tons is a lot of butter. It represents an income of \$4,500,000.00 to the Western producer. Yet it's but one item in the bill for Western foodstuffs sold to the industrial East last year.

Butter is spread on bread, and the wheat to make the bread comes from the West. Ten thousand tons of butter will spread on a lot of bread.

In fact, the East bought over \$15,000,000.00 worth of grains, honey, eggs, poultry and other commodities besides 127,000 tons of fresh and cured dressed meat; 127,705 head of cattle; 21,144

calves; and 41,557 hogs, valued at another \$15,000,000.00.

All told, the East drew on its Western Commissary for over \$40,000,000.00 worth of farm products, providing a vital source of income to thousands of Western farmers.

Your purchases of Made-in-Canada cars help maintain this market, by keeping thousands of Eastern workers in steady employment with regular pay cheques that enable them to buy more Western foodstuffs. And don't forget this domestic market brings far better prices than does the export market.

There are 18,000 workers in Canada's automobile plants, and 15,000 employed in the 202 parts manufacturers' plants. An average of four to a family means over 150,000 people whose prosperity depends in whole or in part on the activities of the motor car builders. Add as well, the employees of railways who live by traffic and you have a huge cross-section of Eastern Canada—a group of people who contributed much of the \$40,000,000 spent last year for Western farm products. Therefore, all Canada—West as well as East—is vitally interested in a sound and well-supported Canadian Automobile Industry.

For statistical and further information about this industry, write to Automotive Industries, 1006 Lansden Building, Toronto.

Burnside Notes

Mrs. B. Woods was a Sunday afternoon visitor with Mrs. N. Eckel

Mr. Arthur Sawers spent Sunday with Mr. Peter Schumaker.

Mr. Jack Clarke spent Sunday afternoon with Robert Eckel.

Lone Pine Baseball Club held a very successful minstrel show and dance last Friday evening.

Miss Marie Poffenroth spent the past week with Mrs. Peter Schumaker.

Mr. George Metz, son Dick and Robert Eckel were Tuesday visitors in Calgary.

Mr. and Mrs. Lewis McCulloch and family of Turner Valley, spent the weekend at their respective homes here.

Mr. Earl Dedels and Miss Dora Tiesen spent Sunday afternoon with the latter's parents, Mr. and Mrs. John Tiesen.

Messrs. James and Jack Dundas, of Allingham, and Fred Metz spent several days in the southern city last week attending the stock show

Mrs. Bert Prose, Mrs. O W Hembling and Mrs. Joe Clarke were Monday afternoon visitors with Mr. Albert Spraggs and Mrs. Otto Bittner.

Notes From the West

Mrs. W. Tryonek is spending the summer with relatives here.

Mr. and Mrs. W. F. Brown were Calgary visitors last week.

Mr. Chas. Brown attended the bull sale in Calgary last week.

Mr. Arthur Sissons visited his sister, Mrs. Harvey Hosegood last week.

Word was received from Miss Connie Hosegood that she had accepted a position as dietician with the Toronto branch of T. Eaton Co

Neighbors and friends surprised Mr. and Mrs. D. Evans at their home Saturday evening, the occasion of their 25th wedding anniversary. A good time was had playing games, prizes going Mrs. Arnold Blain and Mr. Otto Krebs; consolations to Mr. and Mrs. F. Byrt. Supper was served and Mr. and Mrs. Evans were handed a sum of money with which to purchase a piece of silver.

Sydney-McCrea Star In Goldwyn Picture

"Dead End," Samuel Goldwyn's film based on the Broadway stage hit, appears at the Opera House this weekend with Sylvia Sidney and Joel McCrea in the starring roles.

This powerful drama of a day in the lives of a handful of humans who inhabit a "dead end" city street, where fashionable apartments rub elbows with squalid tenements of the waterfront, which set records in its Broadway run and was cheered from coast to coast, reaches even greater heights in the film version.

Sylvia is seen as Drina, slum girl battling desperately to raise herself and little brother Tommy to a better life; McCrea plays Dave, the poor architect she loves, who in turn loves Kay (Wendy Barrie), who has found a way out of the slums into luxury and won't return even for love; Humphrey Bogart is seen as Baby Face Martin, gangster, with a price on his head, who braves death in the slum where he was spawned, only to find that his own mother hates him and that Francy (Claire Trevor), his boyhood sweetheart, has taken life the easiest way. Allen Jenkins appears as Hunk, Martin's henchman, and the Dead End kids from the original New York stage cast, Billy Halop, Gabriel Dell, Bobby Jordan, Huntz Hall, Leo Gorcey and Bernard Punsley, relive their famous characterizations of Tommy, "T.B.," "Angel," "Dippy," "Spit" and Mitty.

WEEKLY SERMONETTE

"Example" is like the press; a thing done is like that which is printed. It goes forth with a self-propagating power and may run to the ends of the earth, and descend from generation to generation.

New Speed Limit In Alberta Towns

Raising of the speed maximum from 20 to 35 miles per hour in towns and villages is provided for in a bill to amend the Motor Vehicles and Highway Traffic Act. The measure was sponsored by Hon. E. C. Manning, provincial secretary.

When explaining the bill to the house the minister said the purpose of the change was to make it applicable to charges of reckless driving. So far as the speed limits were concerned, these were matters for regulation by municipal by-law.

When a car was found to have been travelling at a speed of more than 25 miles per hour in towns and villages, this would be regarded as prima facie evidence of reckless driving, said Mr. Manning.

Another change in the Act is to provide that a motor vehicle about to cross a main highway must come to a stop not less than 10 feet from the highway, in order to ensure greater safety. The bill as originally drafted provided for 30 feet, but on suggestion of officials of the Alberta Motor Association, a change to 10 feet was made by the minister and approved by the house.

One of the objections to the 30 foot proposal was that the car would be too far back from the highway in some places for the driver to have a clear view before proceeding over the crossing.

Amusing Letter.

The following letter, taken from the Port Elgin Times, is an echo of the lighter aspect of the Great War. It is supposed to have been written at that time and we pass it on in the hope that it will bring a smile to our readers.

Grand Prairie, Que., Feb. 19, 16
Mr. Headquarters,
Canadian Army,
Ottawa.

Dear Mr. Headquarters:
My husband was induced into the surface long months ago and I ain't received no pay from him since he's gone. Please send me my elopement as I have a four months old baby and he is my only support. I am a poor old woman and all I have has gone to the front. Both sides of my parents are very old, and I can't suspect anything from there, as my mother has been in bed with the same doctor for thirteen years and won't have another. My husband is in charge of a spittoon. Do I get more than I am going to get? Please send me a letter and tell me if my husband has applied for a wife and child and please send me a wife's form to fill out. I have already wrote to Mr. Borden and got no answer. If I don't here from you I will write to Wilfred Laurier about you and him. My husband says he sets in the Y.M.C.A. with a piano playing in his uniform. I think you can find him there.

Signed—

Anglo-American Friendship

Best Safeguard Of Peace Seems To Be In Rearmament

Several things have lately been announced, spoken and arranged, which add force to hope—at all events to the hopes of those who believe that the best safeguard of peace is found in British rearmament, especially in British sea-power, and in the closest Anglo-American co-operation.

There is the matter of recruitment for the Royal Navy, of which official figures have been given for the years 1930-1937. These stood still at 2,600 entries for 1930 and 1931, and have since then advanced steadily to 11,508 for 1937. Moreover, the number needed for the current year, over 16,000, is regarded as presenting no difficulty. Indeed, it is much easier to want to be a sailor, either officer or rating, than to get to sea, which is well enough.

There is the talk and the fact of co-operation between the fleets of the British Empire and the United States of America, which has proved itself when troubles have come in Far Eastern waters. "If misfortune should overtake us"—Rear Admiral Brumby, commander of the Fifth United States naval district, was speaking at a luncheon in honor of H.M.S. Apollo—"I am sure it will see our navies side by side in meeting it. When a showdown comes we look alike, act alike, and talk alike."

So we do, and so we should. And so say all of us.—The Navy (London).

Fogs Are Expensive

Estimate Of Annual Cost To London Places Figure At \$200,000,000

Fogs over London have always had a romantic implication for fiction purposes, but never for the every-day life of Londoners. The dark pall which falls over the city has been a scourge to be borne patiently. Although bringing untold losses in time and money, and often completely upsetting winter social life, the fog was accepted as unavoidable.

Like Mark Twain's comment on the general subject of weather, much was said about it, but little done. Now, at last, it appears that the Briton has had enough, and the Ministry of Health is planning a determined campaign to eliminate fog by attacking its chief cause—smoke. A conference of local authorities has been called, and the laws affecting smoke abatement are to be tightened.

During the past 29 years modern methods of combustion have made the London atmosphere considerably cleaner. The modern "pea soup," although lighter, is still sufficiently akin to that gray-brown blanket which formerly covered the city to affect respiration. And one estimate of the annual cost of fog to the nation's industry places the figure at \$200,000,000.

Are Well Trained

London policemen are trained in the work of firemen so that they may be able to face the risk of rescuing persons from burning buildings. They also have a practical knowledge of first aid, car driving, swimming, and life saving.

The University of California has a solid board of sugar pine, 5½ feet wide, 18 feet long, and 8 inches thick. It was cut as a table top, but is now preserved as a curiosity.

When rafts are placed in water frequented by muskrats, it has been found that the rats quickly take advantage of the floats as a base for their homes.

FLIN FLON

"The Story of Its Finding and Position To-day"

By PRATT KUHN

While at Island Falls I found that Jeff Home-Hav was coming back to go up to Rocky Falls on Reindeer Lake, another 60 miles away, so I went there, as men and supplies were being flown in from Island Falls to erect cribbing baffle dams restraining the water from Reindeer Lake (which is a mere 175 miles long, 40 miles wide, but averaging five miles, and in some places 800 feet deep and an area of 2,300 square miles) from rushing down Reindeer River into the Churchill and thus to the power plant at Island Falls.

About 40 men were on the job, just starting. They and their machinery and supplies had all been flown in and the engineer in charge was O. L. Flanagan of Toronto for the Fraser Brace Co.

Here I met the famous flying trapper of the early days, Del Simons, who now lives at Island Falls with his family. He is in charge of cruising and is a magnificent man of 200 odd pounds and about six feet tall.

Six miles from Rocky Falls there's still a Hudson Bay Post on an island, and fur trading is carried on with the Indians and trappers.

I was told there's a flyer named Turnbull from Flin Flon, who is commercially fishing this lake and he takes out whitefish four to 15 pounds, trout up to 40 pounds, pickerel, grayling, herring and sturgeon. Reindeer Lake, by the way, is the natural water route from The Pas.

I joshed the cook because I told him that all he had to do now was heat water for tea or coffee and wash up. This is literally true, because here's the food brands I found in his supply tent, and they're all of the best too:

Clark's Pork and Beans
Heinz Baked Beans
Campbell's Tomato, Vegetable Soups
Shamrock Pure Pork Sausage
Grade A Eggs
Libby's Dill Pickles
Raymore Mixed Pickles (Wpg.)
Aylmer Golden Waxed Beans
Burn's Bakeasy Shortening
Security Creamery Butter
Maxwell House Coffee
Blue Ribbon Tea
Fry's Cocoa
Pacific Evaporated Irradiated Milk
Klim
Nabob Spices
Dr. Jackson's Roman Meal
Shredded Wheat
Grape Nuts
Kellogg's Corn Flakes
Minute Tapioca
Aunt Jemima Pancake Flour
Aylmer Bartlett Pears
Del Monte Prunes
Quick Quaker Oats
Robin Hood Flour
Robin Hood Yellow Corn Meal
Magic Baking Powder
Cow Brand Soda
Goderich Iodized Salt
B.C. (Rogers) Sugar
Kee's Mustard
Bread from Flin Flon Bakery.

Has Had Colorful Life

Ex-Governor Of Bengal Is Liked By Everyone

Sir John Anderson, ex-Governor of Bengal from which he recently returned to England, is an "oldoaker." Terrorists in Ireland and in India have done their best to rattle him—he's been called the "most shot at man in the world." He still has a humorous calm. Whether or not the Mahatma approved of Sir John's firm, though kind, restoration of order in Bengal, even Gandhi himself "fell" for Sir John. And one of the retiring Governor's last good-bye visits was to Gandhi, sitting cross-legged in his favorite place, under the banyan tree (largest in the world) at Barrackpore. Sir John is the kind of man to whom unusual things happen. He was invited by the Maharajah of Bhutan into his State. Less than 40 white men have ever been allowed there. Getting into Tibet is a picnic compared with getting into Bhutan. Sir Jigme Wangchuk, K.C.L.E., doesn't fancy trippers, says the Daily Sketch. Sir John and his suite had all sorts of adventures . . . and one terrible experience. As presents for Bhutan's greatest chieftain (under the Maharajah), Sir John brought a small camera and a smallish pair of field glasses—fascinating novelties for primitive Bhutan. Unfortunately the arrival of Sir John and suite was watched by the Paro Penlop through the largest and most expensive field-glasses on the market. Later he photographed his guests with a superb camera.

Germany shipped over 6,000 tons of medicinal products to other countries last year.

From the town of Flin Flon, Manitoba, the Flin Flon mine plant looks like this in 1937.

Flin Flon mine plant and town taken from an airplane, 1937. Compare this with original camp views.

How do you like the paved streets? This is a winter scene in the Callinan Hill section of Flin Flon, Manitoba.

by DR. J. W. S. McCULLOUGH

Article No. 31

CANCER AND RACE

Professor Walther Fischer, pathological anatomist in the University of Rostock, Germany, has recently reported the results of his investigations of cancer and race. This report shows that the various European races present no manifest differences with regard to the total of cancer as judged by the mortality.

The Jewish population within the large cities of Europe shows the same incidence of cancer and only occasionally differences in respect to localization.

In the United States the incidence of cancer is the same among all women, white or black, whereas the disease is 40% less frequent among male negroes than among white men. Among Japanese and apparently

among Chinese, cancer is about as prevalent as it is among Europeans.

Manifest differences in the most common seats of cancer exist among the yellow races, the Malays and the negroes of South Africa. In the yellow races primary cancer of the liver (with cirrhosis) is most frequently encountered. Cancer of the stomach is extremely infrequent among Malays. Sarcomas are commoner among the coloured races than among the whites. Fischer believes that the differences observed in the incidence and location of cancer are to be attributed to environmental influences and not to inbred factors.

Betel-nut chewers are very prone to have mouth cancer. One sees the same thing in people living as close to each other as the Dutch and the English. Breast and uterine cancer are twice as frequent among Englishwomen as among the Dutch women of Holland. But when the total mortality from the malady is counted it will be found that this total is about the same for each country.

Next article—Cancer from Dyes.

Editorial Note: Readers desiring the complete set of Dr. McCullough's cancer articles at once may secure same by writing to—The Health League of Canada, 102 Bond St., Toronto, Ont.

In England, pawnbrokers are decreasing in number. There now are less than 3,070 in the country, as compared to 3,498 in 1921.

Allen, Publisher, Toronto.

CHAPTER VIII.—Continued

He scaled Lester's Wall, not soaring over it, but scrambling laboriously over it, and made his way to the fox burrow. He expected to find the fox going about its domestic duties innocent of the conspiracy afoot to deprive it of its brush and its future.

He saw no fox. He approached the entrance to its subterranean abode. Ten yards from it he stopped short. At his feet the green grass was stained with red blood. Now he understood the full meaning of a remark Captain Duff-Hooper had made at dinner the night before.

"We should have jolly good sport," the captain had said. "Farmers report numerous foxes in the neighborhood. This morning Lord Fellstone's pack had a splendid run. The fox nearly got to earth but they finally made the kill in Kingsley's Copse."

This then must be Kingsley's Copse, and that arterial smear the life-blood of the homing fox, mangled in its own front-yard, just two frantic leaps from sanctuary.

Ernest gave out a sound half groan, half oath.

"Too late," he said.

He bent down to examine the entrance to the hole. He smelled a foxy smell. For some reason, at that moment, he felt an impulse to run back to the castle and tag Duff-Hooper on his buck teeth with a heartfelt haymaker.

As he was about to turn away from the hole, he heard a sound which started off as a defiant bark and ended in a frightened whimper. Thrusting his arm to the shoulder into the burrow, he touched fuzz. He drew out a feebly squirming cub. The little creature made it plain that after waiting all night for the return of its mother, it was very hungry. Ernest stowed the cub under his coat to keep it warm. He was in no danger of sharing the fate of the legendary Spartan boy, for the orphan was so young it could not bite, only nuzzle.

Ernest conveyed his captive back to the castle and smuggled it up to his tower room. He made no mention of it to any one for he had a feeling that they might consider that he was giving aid and comfort to the enemy in this one-sided war.

Having bedded the cub down on his overcoat in a closet, he tugged the bell-rope and summoned Sloat.

"Get me a jug of warm milk at once, please," Ernest said.

"Very good, sir."

"And see that a jug of milk is brought here every morning and evening."

"Yes, sir."

"I intend to take milk baths," said Ernest. "I hear they are good for the complexion."

Sloat departed to get the milk and to spread the news of this latest vagary of the mad American.

His soft-footed return found Ernest in the closet soothing the cub by stroking it. Ernest popped out of the closet and slammed shut the door. "Thanks, Sloat," he said, taking the jug.

A plaintive whine came from the closet.

"What's that, sir?" asked Sloat.

"What's what?"

"That sound," sir.

"I heard no sound."

Once again the cub voiced its need for nourishment.

"There it is again, sir," said Sloat. "It sounds like the cry of a very young baby."

"It is," said Ernest.

Sloat tried hard to remember that a well-trained servant does not show his emotions, especially the most un-British of them, inquisitiveness. But curiosity scored yet another triumph over tact.

"Yours, sir?" inquired Sloat.

"Naturally."

"Boy or girl, sir?"

"One of each."

"How old are they, sir?"

"Born this morning."

"Indeed, sir. And might I inquire, sir, where their mother is?"

"Oh, she's been done away with," said Ernest.

"Done away with, sir?" quavered Sloat.

"Eaten."

"My word!" was all Sloat could say. "My word!"

He seemed about to flee from this unnatural father and possible cannibal, when Ernest said,

"I'm joking, of course. There's no baby in the closet."

The cub made a liar of him with a yelp.

"I've fooled you, Sloat."

"You've astonished me, sir."

"I'm studying ventiloquism," explained Ernest. "The earl is teaching me to throw my voice."

Sloat relaxed.

"I should like to learn how, sir. I could tease Cook."

The cub made sounds fairly lusty for one so young.

"Am I good or am I good?" said Ernest.

"Marvellous, sir," said Sloat. "I could swear there was baby, or a young animal in there."

"That's what practice does," said Ernest. "You may go now, Sloat."

"Thank you, sir," said Sloat, and bore his latest bulletin from bedlam to a waiting servants' hall.

Among those into whose receptive ears Sloat poured this and other tales of the corymbic conduct of the castle's tenant was Babette, maid to the Duchess of Beddington. Babette was from the south of France, of the race of Tartarin of Tarascon, which produces many poets but few reporters. The narrative with which Babette regaled her mistress while putting on that lady's evening face did not lack color however it may have sinned on the score of accuracy.

"Quel type d'homme!" said Babette. "Il est toque."

"Don't jabber," said the duchess. She was an extensive lady known in her circle as "High-pockets."

"He is cracked in the kettle, that monsieur American," said Babette.

"Shouldn't wonder," drawled the duchess. "Must be if he's a friend of George Bingley."

"This so droll one keeps bebes in his closet, and never wears the clothes," went on the maid.

"Never? Frugal of him," said the duchess.

"But he is of a richness formidable," said Babette etching on an eye-brow, "and, on dit, he has the sheep's eyes for Lady Rosa."

"Mmmmm," said the duchess. "Thought she was booked to marry that stick of a tin soldier."

"The betting in the servants' hall is even money to the contrary, Madame la Duchesse."

The Duke of Beddington, Bumpy to his intimates, came in to dress for dinner. He was an angular, bony chatter-box stooped by the weight of a mustache shaped like the horns of a water-buffalo. He had attempted to dye it red but it had come out an off-shade of purple.

As he insinuated himself into his stiff shirt his mate relayed to him the tid-bits about Ernest.

"Fella belongs in a loony-bin," said the duke. "Old Bingo was yarning about him at the club. Says he's not a bad sort, really, and scandalously rich. Why, the fella stumped up a thousand of the best for a month's rent of this old hut without batting an eye."

"Babette says he owns the Mississippi River."

"Girl always exaggerates," said the duke. "Doubt if he owns more than half of it."

Dressed, he transported himself and mustache to the Great Hall, had three quick neat brandies, and passed on his version of the Ernest saga to a fellow guest, Major General Sir Frederick Cowley, K.C.B., known in the artillery as "Mooley Cowley" because of his name and a noticeable resemblance to that useful animal.

"Fella has a closetful of squawling babies, shoots foxes, and thinks he somebody in 'Ivanhoe'; but he own most of the Mississippi River," said the duke.

"Fancy!" said the major general.

"Think I'll broach the subject of a slight loan," said the duke, "say five thousand for a starter."

"Shouldn't."

"Why not, Mooley? Fella's a Yank. All Yanks have a weakness for titles: And I'm a real duke, aren't I? I'll wager you sixpence the fella will be tickled plaid to let me have say, ten thousand—"

"Doubt it."

"Why?"

"Nobody is that crazy."

"You're probably right," said the duke, sadly. "Well, Mooley, old sprout, here's mine in your wig."

"Toot-toot," said Sir Frederick, and they clinked glasses.

Sir Frederick handed on to the Hon. Mrs. Fordyce his information about Ernest, and she told Ronnie Pym, and he told Lady Gwladys Wotton, and she told Colonel Pringle, D.S.O., and he told the Countess of Bathberry and she rushed to the powdering-room to scribble down the data for use in the next "Dashing About With a Dowager" column, which, under the pseudonym of "Godiva Gadabout" she conducted in one of the largest London dailies.

Ernest, unaware of the interest with which his advent was awaited, was playing nurse-maid to the fox cub behind locked doors, when he heard a thumping at his door.

"Who is it?" he called out.

"Me, I," replied the voice of the Earl of Bingley. "May I come in, please?"

"One moment," said Ernest.

He bent close to the little fox.

"Now be a good cub and keep quiet," he whispered.

The cub, full of milk and contentment, was licking the polish on Ernest's best shoes as he closed the closet door on it.

Ernest admitted the earl who was wearing the dinner suit he had acquired on his return from the Boer War. Already the bow of his black tie had ridden around his collar and was diving out of sight.

The earl sniffed.

"I say, what sort of perfume do you use, Ernest?" he asked.

"I never use any, sir."

"Don't you notice a rather racy aroma?"

"No, sir."

(To Be Continued)

For examination of metals and exploration for porosity in castings, X-rays are now commonly used by metallurgists and research laboratories.

Refused To Give Up

Fastest Mile Run By Boy Who Overcame Handicap

For man to run a mile in four minutes has long been regarded as on the verge of the impossible. Those who know something of the limit of human capacity have hesitated to say it could not be done. But they have pointed out that the fastest mile ever put together on paper—a composite of the fastest quarters run by Taber, Lovelock, Cunningham and San Romani—adds up to three minutes and 58.4-5 seconds. Thus the "dream miller" could be no more than 10 yards or so slower than the greatest composite runner at the distance.

At Hanover, N.H., two whole seconds were clipped from the world mark, to bring the four-minute mile appreciably nearer the range of the possible. Glenn Cunningham, who a few weeks ago had told an interviewer that some day someone would hit 4:01 "but it won't be me," came within two-fifths of a second of belying his own prophecy. His time was four minutes and 42.5 seconds. The fastest mile before this had been run by the London bank clerk, Wooderson, on a heavy track. A race between this pair, under conditions as nearly ideal as those at Hanover, would by all sports logic be an event of the century.

No comment on Cunningham's feat afoot would be complete without citing again the personal triumph which his success on the track embodies. As a lad, his life was despaired of for weeks after his legs had been frightfully burned in a schoolhouse fire. He took to running to repair the effects of the injury, as Detroit's Bill Bonthron also did, after being burned by a high tension wire. In overcoming a physical handicap both went far beyond the ordinary capacities of men. It would be a pleasing consummation to all sportsmen if the dream miller, whoever he is, were such a representative of the power of human resolution to defeat the cruelties of fate.—Detroit News.

Shuns Everything Modern

The church at Downe, England, birthplace of Charles Darwin, is still lighted by candles. The village scorns such modern conveniences as electricity, gas, movies, railway stations, or sewage systems, although it is situated just 20 miles from London.

Grandfather used a roller towel, a comb suspended from a string and a dipper shared by all, and lived to be 86. Grandson fights germs and dies exhausted at 50.

The Cathedral of Seville, Spain, is the second largest Gothic edifice in Europe. It was dedicated in 1402 and contains the tomb of Christopher Columbus.

A Lucky Accident

Opened Way To Fame And Fortune For Screen Actor

It was 30 years ago that Andy Devine, a child of 3½ years, tumbled off a couch in the family's modest little home in Kingman, Arizona. Clutched in his fingers was a long, supple sliver of wood, which the child had slipped from the seam of a window shade. The little stick broke, a jagged end punctured Andy's throat—and there was set in motion a strange series of physiological disturbances that eventually led Andy to the gates of fame and fortune. That unhappy incident marked the birth of the now famous "gravel voice," a low rumbling disturbance or a high screeching whine that Andy is able to control at will—and which, counting screen and radio contracts, nets him in the neighborhood of \$3,500 a week.

Liner Of The Future

Will Be Streamlined Glass-Enclosed Speedboat Is Prediction

The Atlantic liner of the future will be a streamlined, glass-enclosed speedboat capable of making the trip from New York to Southampton in 3½ days.

This wonder ship was outlined by M. Pierre de Maligne, of the French Line, and A. C. Hardy, engineer, in a paper read at the Institute of Marine Engineers.

Air in the enclosed vessels would be conditioned. Passengers could play games on the upper decks without being buffeted by winds or annoyed by gases from the funnels. Temperatures would be regulated in accordance with the weather.

Found After Many Years

Former Private Receives Bible Lost On French Battlefield

Twenty years ago, somewhere in the mud of a French battlefield, a private in the A. E. F. lost the pocket Bible he had carried from his Minnesota home. A letter from Australia recently told him it had been found at Queanbeyan, Australia, and would be forwarded if he would communicate with the finder. The Bible's owner is now the Rev. Samuel T. Berg, pastor of the Mosses Hill Church near Loomis, Nebraska.

The largest open-pit iron ore mine in the world, near Hibbing, Minn., contains over 70 miles of railway tracks over which ore is hauled to the surface.

LOCAL & GENERAL

Mr. J. Kirby spent the week end visiting relatives in Calgary.

Miss Doris Friesen, of Calgary, spent the weekend at her parental home here.

Mr. J. V. Berscht was a business visitor in the capital city on Wednesday.

Mr. Otto Mueller, of Ghost Pine, visited with his sister, Mrs. Bert Fisher and family, over the week end.

Harold Erb who attended the Youth Training Centre in Calgary during the winter, returned home on Saturday.

Mr. Frank Moyle who visited the capital city last week, returned on Friday. Frank intends leaving for the north country early in May.

Mr. Lex Wallace has been transferred to the lumber yard at Coronation and will leave about April 15th. Mr. Lutz, of Coronation, will take over the Didsbury yard.

Mr. W. J. Scheidt received a telegram Saturday reporting the death of his brother Edward in Oregon. He left by bus Sunday for Oregon to attend the funeral.

Mr. Archie Boyce has taken over the McKinnon farm on the highway near the Olds School of Agriculture and will move to his new place this month.

For extra good value in roomy well-fitting work shirts, wear one of our \$1.00 line.—T. E. Scott.

W. J. McCoy was successful in obtaining a contract for crushing and hauling gravel for the seal coat which will be put on the highway south of Calgary to Okotoks.

Bold...sharp...dramatic...lighting strange corners—that's "Dead End" at the Opera House this Friday and Saturday. Magnificent cast, daring production in the Goldwyn tradition.

Mr. H. J. Harder suffered a severe fall on Tuesday. On examination it was found that no bones were broken, but he was severely bruised.

The W.C.T.U. will serve supper in the Leuzler Block on Saturday evening, April 9th, from 5 o'clock to 8. Adults 35c; children under 12 15c. Table of candy and home-cooking. You are invited.

Clint Reiber, Jim Kirby, Tom Johnson, W. G. Liesemer, Alf Bruso, Alex McNaughton, and J. V. Berscht were among the hockey fans who attended the Trail-Port Arthur game at Calgary on Tuesday night.

Just try a pair of men's good strong work boots from T. E. Scott.—\$2.50 per pair, up.

Have your clothes in top shape for Easter. J. V. Berscht & Sons are agents for Dollar Cleaners and Dyers, Calgary.—Our prices are lower.

Come in and see our Easter display: Potted and flowering plants, fresh coast daffodils; Easter cards, boxed chocolates. In fact, everything for Easter at Chambers' Drug Store.

Large size double-ply 1 1/4" raw-hide halters.—Only \$1.00 from T. E. Scott.

New shipment of china: Cups and saucers 39c and 69c each; glass goblets 25c, sherbets 25c.—See them at Chambers' Drug Store.

Municipal gopher poison.—The best brands at 35c tin.—Chambers' Drug Store.

Order your Easter flowers now.—Berscht & Sons, agents for A. M. Terrill, florists, Calgary.

Must Label Fertilizer.

Every mixed fertilizer on sale in Canada must contain at least 14% nitrogen, phosphoric acid, and potash, singly or combined. Minimum quantities for each are established. Fertilizer constituent materials are standardized and subject to minimum percentages of plant food substances. Every fertilizer must be labelled to show the brand names and guaranteed analysis.

Would Reduce M.L.A.'S to 53

Appointment of a committee to study redistribution, with a view to cutting down membership in the Alberta Legislative Assembly from 63 to 53 was provided in a notice of motion given the Alberta Legislature on Monday by Hon. Lucien Maynard, minister of municipal affairs.

Including reduction of 1 member for each 6-member constituency of Edmonton and Calgary, the minister's motion proposes the committee make its report at the next regular session of the legislature in 1939.

Knox United Church Notes.

Next Sunday is Palm Sunday and the week following is known as Holy Week when the thoughts of Christians are turned to the events of the last days of Christ's life upon earth. The services next Sunday will be appropriate to the season. The sermon theme will be "The Power of the Cross." Cordial invitation is given to all.

On Easter Sunday the Sacrament of the Lord's Supper will be observed and as a preparation for this service we urge all our members and friends to attend the union services on Good Friday morning (See announcement in another column).

Evangelical Church Notes.

Next Sunday morning the theme will be, "The Passion of God." In the evening the final sermon in the Travelogue series will be preached. See separate announcement of Holy Week services.

Items of Interest

A half-dozen Chicago crop experts preparing their first estimates of the 1938 wheat production in the U.S.A. Monday pored over reports from hundreds of farming communities which indicated that harvest of the biggest crop in seven years, valued as high as \$720,000,000, is possible.

Of the many exhibits personally visited by King George at the British Industries Fair which he recently opened, local interest attaches to his visit to the Heel Hugger booth, where His Majesty closely inspected the styles and evidenced great interest in Canadian leather and foot wear.

H.R.H. the Duchess of Gloucester selected from the Heel Hugger exhibit for her own personal wear six different shoes ranging in style from a brown suede afternoon pump to a blue suede zipper model and very graciously complimented the Heel Hugger manufacturers on the excellent fit, style and quality of her selections.

J. V. Berscht & Sons are local agents for Heel Hugger Shoes.

Efforts are being made at Castor to prevent people from listening in on party-line telephone conversations. The following resolution was adopted at a meeting of the Mutual Telephone Company:

"We, the shareholders of this company, hereby enter into a gentleman's agreement to refrain from listening to all conversations not intended for us in future."

Now Castorites are asking whether ladies are expected to live up to a "gentleman's agreement" and forbear from listening in to neighborhood gossip.

You will save money by buying your work clothes from T. E. Scott.

Gopher Poison Notice.

The Municipality of Westerdale No. 311 has arranged with the dealers in gopher poison at Didsbury, Olds and other points to supply an equal amount of gopher poison to that paid for by the farmers of the municipality, the arrangement to be in effect until the 1st day of June 1938.

The Council requests that the farmers place their poison early.

A. McNAUGHTON, Sec.-Treas.
Municipality of Westerdale
No. 311
